- **Gergely Orosz** - Author of **The Pragmatic Engineer**, the **#1 technology newsletter** on Substack,
- **Kent C. Dodds** - Co-Founder, Director of Developer Experience at **Remix.**

What is the State of Frontend 2022?

The State of Frontend is a community project between TSH, independent frontend engineers, and niche specialists. We have put together questions for the greater frontend community to gain insight into their everyday work, the tools they use, and what they hope to learn in the future.

Why frontend?

Because frontend is at the front line where communication takes place between user and service provider - it can make you or break you. It's in the design that you see when you open an app, and it's what makes up your mind whether to use it or not. Frontend is important!

What does the State of Frontend 2022 cover?

In our questions, we cover libraries, frameworks, habits, hosting, micro frontends, design, QA - and more. This makes it easier to:

- plan your own frontend education,
- support the talent in your organization,
- plan in-house training,
- make strategic decisions about your products and business tech stacks.
